MEMORANDUM

DATE: 3/10/2015

TO: Reynoldsburg City Council

CC: Mayor Brad McCloud, Auditor Richard Harris, Service Director, Nathan Burd

RE: Authorization to enter into a contract with Bermex Inc. for meter reading

Our meter reading position is currently open. At this time, I would like to enter into a contract with Bermex, Incorporated to read our meters. Utilizing a company to read meters is a key component of our eventual transition to monthly billing. For now, Bermex will read a third of the City monthly.

No new appropriation is needed for this item. The cost for the contract will be split between Water and Wastewater and will be paid with existing funds within those budgets. This contract will last until February of 2016.

We will be billed per attempted read as follows.

Touch Pad and manual read is .55 cents a read

Radio Read unit will be .25 cents a read

We anticipate a cost of approximately \$1,745.00 monthly and \$20,940.00 annually. This is a more cost effective meter reading solution than hiring a new employee and the company will be equipped to read all the meters monthly when the transition to monthly billing occurs.

If you have any questions, please contact me at (614)322-4500.

REYNOLDSBURG, OH

PROJECT UNDERSTANDING

Background

Reynoldsburg, OH has approximately 12,400 meters with a mixture of manual, touchread and radio read Sensus technologies.

Technology	Services
Manual Read	10,000
Touchread	1,100
Radio Read MXU	1,300
Total	12,400

Reynoldsburg, OH currently reads and bills the above services quarterly. They have the City broken up into three (3) cycles and one meter reader will read one cycle each month. They are currently deploying Sensus's FlexNet migrate-able drive by to fixed based AMI solution. They plan on deploying this technology in house over the course of the next five (5) years.

Goals

Reynoldsburg, OH has determined that they want to move to monthly billing for all its customers. In order to accomplish monthly billings they are wanting to explore options available to them to outsource meter reading duties until the new Sensus FlexNet drive by solution is fully deployed. They are wanting to start monthly billings January of 2015.

Project Analysis

We believe that Reynoldsburg is making the right decision by migrating to monthly billing and adding technology to existing meters. These two steps alone will help to increase operational efficiencies, increase monthly revenues and improve customer service by stabilizing water bills, improving usage analysis and being able to react more quickly to issues as they arise.

Because our Firm is a full service metering and technology solutions integrator, we wanted to provide a few options to help you overcome your challenge of migrating to monthly billings. As you know, we specialize in working with clients to help them design, develop, finance, and implement system-wide conversions to new drive by or fixed network metering technologies. Our value is best demonstrated by our proven ability to help clients rapidly and efficiently expedite the conversion to these new revenue enhancing technologies – often times reaching 100% completion in mere months as opposed to stretching the conversion out over multiple years.
